OPEN-AIR UNIVERSITY

Lakes are essential ecosystems for the rural communities living nearby. They influence and affect the sustainable development of local communities. Lakes should be preserved, conserved, and maintained. With the EUbylakes project, lakes become the perfect stage to discuss the future of Europe freely. Eubylakes is about an Open-Air University for Europe and across Europe to discuss and design a talking path for our future Europe. It consists of an open learning academy divided into six modules and a final Lackathon.

The first three Modules examines the pillars of future Europe: **Democracy, Cohesion, Equality**. The seconds move on analysing the drivers of its sustainability: **Climate Neutrality Biodiversity, Digital Innovation**. The last event is the **Lakthon, a creative marathon** to wrap-up the Modules learnings and to develop new ideas to shape the Europe of the Future.

EUBYLAKES

Promotes forward-looking discussions on the future of Europe

Increases participants' knowledge and understanding of EU

Contributes to citizens' awareness of EU

Establishes a permanent Open-Air University by Lakes
